ABOUT FRUITENIA

FRUITENIA project aims to increase the competitiveness of fruit production sector among the beneficiary farmers in Armenia. Towards this impact, the project will develop capacity of the Armenian National Agrarian University (ANAU) to offer training based on modern curricula, adequate infrastructure and qualified specialists. The ANAU will have its faculty trained in teaching, and its infrastructure will be enriched by a demonstration orchard with modern technologies. **FRUITENIA** will also increase the capacity of the TVETs in teaching up-to-date fruit production. The modern fruit production methods and techniques will be communicated with project beneficiaries through videos in Armenian and other resources via an online e-learning platform www.aygi.am.

FRUITENIA PROJECT WILL:

Increase the overall competitiveness of the fruit production sector

Promote environmentally friendly, sustainable and climate smart agriculture

Ensure social inclusion and gender balance in the fruit production sector

- Conduct in-depth assessment on capacity needs of the fruit production sector
- Modernize the fruit production related course contents at the Armenian National Agrarian University (ANAU) and develop knowledge and teaching capacity of ANAU instructors
- Launch a professional short-term certificate programme in fruit production
- Develop knowledge capacity of TVET instructors in modern fruit production
- Establish a demonstration orchard
- Organize a summer Youth Camp for ANAU and TVET students to generate interest in climate smart fruit production and rural development
- Reduce gender-specific barriers in agricultural education
